

How does the M-Fluencers Maths Quest work?

From 1st May to 31st May 2021, schools throughout Australia and New Zealand will have the opportunity to compete on mangahigh.com to win prizes for their students. Students complete maths games and activities to earn medal points, and earn fun prizes!

How do I get involved?

Once you have signed up your school, you will receive your teacher login details for mangahigh.com. We will then communicate with you to create accounts for all your participating students.

- 1) Create student logins: Don't forget to set your class curriculum focus!
- 2) Add teachers: More teachers = more classes = more points for your school! (We're very mathematical here)
- 3) Assign tasks: Students will see recommended activities on their dashboard if you have set a curriculum focus, but it's better for you to assign relevant activities for them to complete.

Once the challenge starts, any points your students gain from completing an activity will contribute to your school's total points on the leaderboard. The goal is for your students to earn as many points by achieving a Bronze, Silver or Gold medal in an activity. If you and your colleagues would like training on how best to use Mangahigh during the challenge, [please email us](mailto:support@mangahigh.com) and we can arrange an online training session for you.
