

## How does the competition work?

From November 9th - 14th 2020, all schools throughout England will be competing on mangahigh.com, to win prizes for students, teachers and schools.

## How do I get involved?

Once you have signed up your school on our competition page, you will receive your login details for mangahigh.com. You then need to follow these three easy steps to get your account ready for the competition:

- 1) Create student logins: Don't forget to set your class curriculum focus!
- 2) Add teachers: More teachers = more classes = more points for your school! (We're very mathematical here)
- 3) Assign tasks: Students will see recommended activities on their dashboard if you have set a curriculum focus, but it's better for you to assign relevant activities for them to complete.

Once the competition starts, any points your students gain from completing an activity will contribute to your school's total points on the competition leaderboard. To improve opportunities for smaller schools, there will be two leaderboards, one for all schools and one for schools with under 200 participating students. The goal is for your students to earn as many points by achieving a Bronze, Silver or Gold medal in an activity on Mangahigh.com.

If you and your colleagues would like training on how best to use Mangahigh during the competition, [please email us](#) and we can arrange an online training session for you.
